(54) SEPARATION-TYPE LIQUID SEASONING

(57)Abstract:

PURPOSE: To prevent the adhesion of solid matter to the upper part of the wall of the container containing a separation-type liquid seasoning containing water and an oil-insoluble solid material, by filling the seasoning in a container made of polyethylene terephthalate.

CONSTITUTION: A separation-type liquid seasoning which is separated into the oil phase and the water phase when left at rest and can be emulsified by shaking before use, e.g. dressing, marinade sauce, barbecue sauce, etc. is filled in a container made of polyethylene terephthalate. The adhesion of solid matter having particle size of 0.05W10mm to the wall surface of the container can be prevented by the process.
